# Garmi Mapsource:Missing or Incorrect Language.dll file

Question:Has anyone had experience with Mapsource reporting an incorrect or missing Language.dll file..?

Answer:
Missing Language files in MapSource:

Open my computer; Go to your c drive
Open the Garmin folder then delete the following files mapsource_lang.dll & mapsource.exe
Then re-install the software and it should be fine

Moj Komentar:
mapsource_lang.dll pomeni vse datoteke (npr. MapSourceSLV.dll oziroma od MapSourceCHS.dll MapSourceTRK.dll in še mapsource.exe!!!
Potem ponovno instaliraj Mapsource!!!
Sandi
